The screenshot shows a Firefox browser window with several tabs open. The main content area displays the GNOME Extensions website, specifically the page for the 'Dash to Dock' extension. The extension's description and download options are visible. A modal dialog box from the 'Dash to Dock' extension is overlaid on the page, asking for permission to run in Private Windows. The dialog includes a checkbox labeled 'Allow this extension to run in Private Windows' and a 'Okay' button.

- Buka lagi web tersebut, cari Dash to Dock - Klik on.

Your native host connector do not support following APIs: v6. Probably you should upgrade native host connector or install plugins for missing APIs. Refer [documentation](#) for instructions.

 **Dash to Dock** by micheleg | 6862396 downloads ON 

A dock for the Gnome Shell. This extension moves the dash out of the overview transforming it in a dock for an easier launching of applications and a faster switching between windows and desktops. Side and bottom placement options are available.

Works perfectly but crashes and freezes the launcher on Ubuntu 23. I just have this extension alone and all of a sudden it freezes
